

Application Serial No.: 10/646,192  
Attorney Docket No.: 0260257

**List of Claims:**

**Claims 1–29 (Cancelled)**

**Claim 30 (Currently Amended):** A method of creating a digital home movie library,  
the method comprising:

~~receiving packetized movie data to at least one set-top box~~ at a hardware device, said  
movie data including a video file, a plurality of audio files each in a different language, and  
associated metadata, wherein said associated metadata include a language attribute for each of  
said plurality of audio files;

~~automatically storing on said at least one set-top box~~ hardware device said video file  
~~packetized movie data including a movie and associate metadata;~~

filtering said plurality of audio files based on said language attribute for each of said  
plurality of audio files and a user's selected language stored in said hardware device to select  
desired one or more of audio files from said plurality of audio files;

storing on said hardware device said desired one or more of audio files; and

discarding one or more of said plurality of audio files other than said desired one or more  
of audio files

~~incrementally assembling said packetized movie data to form one or more full movies;~~  
and

~~making said one or more of movies available via said at least one set-top box for a time~~  
~~period managed at least in part by a software executed by said at least one set-top box, wherein~~  
~~said associated metadata includes a start date associated with said movie causing said set-top~~

Application Serial No.: 10/646,192  
Attorney Docket No.: 0260257

~~box not to allow said movie to be viewed, after said movie having been stored in said set-top box, until a later date indicated by said start date.~~

**Claim 31 (Currently Amended):** The method of claim ~~[[119]] 30~~, wherein said ~~one or more movies~~ movie data are available for a limited time and thereafter are essentially removed.

**Claim 32 (Currently Amended):** The method of claim ~~[[119]] 30~~, wherein said ~~movies~~ movie data are encrypted to limit the availability in at least one of the following respects: being copied multiple times, being viewed more than once, or being viewed or copied other than if conditional access is provided.

**Claim 33 (Currently Amended):** The method of claim ~~[[119]] 30~~, wherein said datacasting receiving ~~comprises transmitting said packetized movie data~~ is via terrestrially broadcast standard television signals.

**Claim 34 (Currently Amended):** The method of claim ~~[[119]] 33~~, wherein payment for viewing said movie data is made through a wireline.

**Claims 35-40 (Cancelled)**

**Claim 41 (Currently Amended):** A digital home movie library system for providing access to movies comprising:

an antenna and a tuner for receiving ~~packetized movie data~~, said movie data including a video file, a plurality of audio files each in a different language, and associated metadata, wherein said associated metadata include a language attribute for each of said plurality of audio files ~~and packetized metadata via wireless broadcast signals;~~

a hard disk drive ~~for storing the received packetized movie data and received packetized metadata;~~ and

Application Serial No.: 10/646,192  
Attorney Docket No.: 0260257

a processor for executing software to:

store on said hard disk drive said video file;

filter said plurality of audio files based on said language attribute for each  
of said plurality of audio files and a user's selected language stored in said hard  
disk drive to select desired one or more of audio files from said plurality of audio  
files;

store on said hard disk drive said desired one or more of audio files; and

discard one or more of said plurality of audio files other than said desired  
one or more of audio files

~~process said received packetized data and to process user input commands, said processor to~~  
~~permit access to said stored movie data under conditions based at least in part on said metadata,~~  
~~said movie data, said software, or any combination thereof;~~

~~wherein said metadata includes a start date associated with said movie data causing said~~  
~~processor not to allow said movie to be viewed, after said movie having been stored on said~~  
~~hard disk drive, until a later date indicated by said start date.~~

**Claims 42-169 (Cancelled)**

**Claim 170 (New):** The digital home movie library system of claim 41, wherein said movie data are available for a limited time and thereafter are removed.

**Claim 171 (New):** The digital home movie library system of claim 41, wherein said movie data are encrypted to limit the availability in at least one of the following respects: being copied multiple times, being viewed more than once, or being viewed or copied other than if conditional access is provided.

Application Serial No.: 10/646,192  
Attorney Docket No.: 0260257

**Claim 172 (New):** The digital home movie library system of claim 41, wherein said receiving is via terrestially broadcast standard television signals.

**Claim 173 (New):** The digital home movie library system of claim 172, wherein payment for viewing said movie data is made through a wireline.

**Claim 174 (New):** The digital home movie library system of claim 41, wherein said digital home movie library system is a set-top box.

**Claim 175 (New):** The digital home movie library system of claim 41, wherein said digital home movie library system is a portable device.

**Claim 176 (New):** The method of claim 30, wherein said hardware device is a set-top box.

**Claim 177 (New):** The method of claim 30, wherein said hardware device is a portable device.
